For detailed information regarding fixing the BuggyBoard™ to different kinds of strollers, please visit:
www.buggyboard.info

WARNING

• Intended for use with only one child at a time from approximately 2 years of age and with a maximum weight of 20 kg (44 lb).
• Always keep your hands on the stroller when your child is standing on the BuggyBoard™. Never leave your child unattended while he/she is standing on the BuggyBoard™.
• Make sure your child is always standing with both feet on the anti-slip rear portion of the BuggyBoard™.
• Never use the stroller’s parking brake while your child is standing on the BuggyBoard™.
• Before each use, check the connectors and tighten if necessary.
• Do not use the BuggyBoard™ if any part is broken, torn or missing.
• Never let children play with the BuggyBoard™.

2. Positioning the connectors.

For more details: www.buggyboard.info

The connectors can be attached facing forward or backwards. The connectors can be fitted onto different shapes of tubing with a maximum circumference of 22.5 cm (9 in.). Bend the strap round the tubing. Then feed the strap through the slot in the connector cover and pull the strap gently. Check the position of the connectors to be sure that
• the arms (81300/81301) will be able to reach the connectors (maximum 35 cm (14 in.), with extenders accessory 39 cm (15.5 in.), above the ground).
• they are as low as possible on the stroller.
• they do not interfere with the stroller’s folding mechanism.
• the arms stay clear of both the braking mechanisms and the wheels of the stroller.

3. Attaching the connectors.

Once certain of the position of the connectors, loosen the strap and fix the Friction Tape on the uprights where the connectors are going to be attached. Reposition the connector over the friction tape and pull the strap tight. Secure the connector by turning the connector-bolt clockwise. Check that the stroller still folds properly and the brakes still work properly; if not, you may need to reposition the connectors.
4. **Tightening the connectors.**

The connectors must be firmly attached to the stroller such that they cannot move.

*(To detach the connector. Turn anti clockwise until the connector come loose)*

5. **Cut the strap.**

Cut the strap as close to the connector housing as possible. Smooth sharp edges.

**Note:** Leaving the strap uncut can interfere with the locking of the cotter pin into the connector, and therefore the safety of the BuggyBoard™ in use.

6. **Rotating the arms forward.**

Turn the platform onto its wheels.

*(A) Unscrew the height adjustment screws (81310) until they are just released.  
(B) Rotate the arms forward then tighten the height adjustment screws.*
7. Positioning the cotter pins.

Measure the distance between the middle of each of the connectors.

Deciding the cotter pin direction.

If the measured distance is between:
- 31-43 cm (12.4-17.2 in.) ⇒ Alt. A below.
- 43-54 cm (17.2-21.6 in.) ⇒ Alt. B below.

8. Choosing the right cotter pin hole.

There are three holes in each arm. To choose the hole that best suits your stroller, position the BuggyBoard™ as close as possible to the back of your stroller, however do make sure that your child can stand comfortably. Screw the cotter pin into the chosen cotter pin hole, tighten with a coin. If the arms are too short to fit to your stroller, use the ‘Extender Kit’, see Fig 13.
9. Connecting the BuggyBoard™.

Unscrew the fixing screws (81340). Adjust the width of the arms and click the cotter pins into the connectors, then tighten the fixing screws. Ensure that the arms are an equal distance from the centre of the board and the cotter pins are locked in the connectors.

10. Leveling the platform.

Unlock the height adjustment screws (81310) and rotate the platform until level. Tighten the height adjustment screws.

11. Disconnect the BuggyBoard™.

At the end of each connector-bolt, slide the red release buttons down, whilst lifting the arms up and out of the connectors.

IMPORTANT!
The BuggyBoard™ must be disconnected from the stroller before folding the stroller. Do not fold the stroller with the BuggyBoard™ attached.
WHEN NOT IN USE

12. Hooking up the BuggyBoard™.

If the BuggyBoard™ is temporarily not in use, it can be hooked up behind your stroller. Clip the hook (81150) onto the platform and attach the strap to a higher point on your stroller.

13. Extender Kit

Item no. 11310

To attach the BuggyBoard™ onto certain stroller the ‘Extender Kit’ may be needed. This will lengthen each arm up to 6cm (2.4"). The Extender Kit is included with the BuggyBoard™.

14. Extra Connector Kit

Item no. 11340

If you want to attach the BuggyBoard™ to another stroller/pram without having to remove the connectors, you may purchase an Extra Connector Kit as a separate accessory. Each Extra Connector Kit contains:

- 2 connectors
- 2 cotter pins
- 2 friction tapes
- 1 strap with hook

The use of any accessories with the BuggyBoard Maxi™ that have not been approved by the manufacturer is not recommended.

CLEANING AND RECYCLING

Cleaning instructions: Use warm water with a soft cloth and a mild non-abrasive cleaning fluid. All BuggyBoard™ parts and packaging are made from recyclable materials.
TESTS

We are committed to ensuring that this product is of the highest quality. The manufacturing process is regularly checked by both internal and external (TÜV) controllers. Samples of parts and completed products are also taken out regularly for tests in our own testing laboratory. The BuggyBoard-Maxi™ is tested and approved by Tüv Süd Hong Kong according to the relevant clauses in EN 1888:2003 Clause 6.1.1 – 6.1.5, 7.2.2.6, 17.3, 18.2 and 21.4

WARRANTY

Your BuggyBoard™ is warranted to be free from manufacturing defects for a period of one year from date of purchase under normal use and in compliance with the operating instructions. This warranty extends only to the original retail purchaser and is only valid when supplied with proof of purchase.
OTHER LASCAL PRODUCTS

KIDDYGUARD® AVANT
safety gate which keeps your child on the safe side

• Needs minimum space, disappears when not in use.
• Easy to attach. Can be fixed inside or in front of openings
• Easy to use, one-hand operated.
• Locks automatically open or closed
• Safe and secure. Exceed both the new European safety standard EN 1930:2011 and the American ASTM safety standard F1004-10
